Introduction

The intimate care policy at The Federation of St Mary's Catholic Schools is committed to ensuring that all staff responsible for the intimate care of the children will undertake their duties in a professional manner at all times. We recognise there is a need to treat all children with respect; no child should be attended to in a way that causes stress or pain and instead this time is used to create opportunities for children's Personal, Social and Emotional Development. It should be noted that it is the expectation of The Federation of St Mary's Catholic Schools that children should be fully independent with toileting when they start Nursery.

Should your child have a toileting accident; staff will encourage the child to undress independently where possible. If adult help is needed, the adult is to remove only the clothes required to reach soiled nappy/pants unless further soiling has occurred and the child needs to be changed fully. Children's skin to be cleaned with disposable wipes (by the child whenever possible) and disposed of in a nappy bag into the nappy bin. Children will be encouraged to dress independently in clean clothes if soiled. Dirty clothes to be put into a plastic bag and given to parents/carers when the child is picked up at the end of the session. Staff members will not attempt to wash or rinse the clothes. Staff will encourage the child to wash their hands.

If your child has a medical need which prevents them from toileting independently, then please see the following Intimate Care Plan.

Toilet Introduction Procedures

As children develop bladder control, they will pass through the following three stages:

1. The child becomes aware of having wet and/or soiled pants
2. The child knows that urination/defecation is taking place and can alert a member of staff
3. The child realises that they need to urinate/defecate and alerts a member of staff in advance

During these stages, members of staff will assess the child over a period of two weeks to determine:

- If there is a pattern to when the child is soiled/wet.
- The indicators that the child displays when they need the toilet, e.g. facial expressions.

Staff will implement the following strategies to get children used to using the toilet and being independent:

- Familiarise the child with the toilet, washing their hands, flushing the toilet and reference other children as good role-models for this practice
- Encourage the child to use the toilet when they are using their personal indicators to show that they may need the toilet
- Take the child to the toilet at a time when monitoring has indicated that this is when they would usually need the toilet
- Ensure that the child can reach the toilet and is comfortable doing so
- Stay with the child and talk to them to make them more relaxed about using the toilet
- Don't force the child to use the toilet if they don't want to, but still encourage them to do so using positive language and praise
- Deal with any accidents discreetly, sensitively and without any unnecessary attention
- Be patient with children when they are using the toilet, and use positive language and praise to encourage them
